EquiGreen Prebiotic 1 kg | 1 kg

Manufacturer	EquiGreen®
Product number	1306
Weight	1kg
Length	98mm
Width	98mm
Height	158mm

Product description

Complementary feed (powder) for horses

Feeding-related support for a stable digestion

In a healthy intestine, the balance of the intestinal flora is intact. Pathogenic bacteria thus do not find an ideal habitat and can develop only with great difficulty. Since a large part of the immune system is located in the intestine, an intact intestinal flora favors a well-functioning immune system.

EquiGreen Prebiotic contains a special mineral complex that has toxin-binding capabilities. In particular, **EquiGreen Prebiotic** supports the intestine in the binding power of liquids (e.g. in liquid feces). The development of a healthy intestinal flora is essential for a healthy development.

Composition: linseed expeller, brewers' yeast cell walls (MOS)

Additives/kg: Technological additives: bentonite (1m558i) 100 g
The total amount of bentonite must not exceed the permitted maximum level in complete feedingstuff of 20000 mg/kg of complete feedingstuff.

Analytical constituents: crude protein 13.8%, crude fat 3.3%, crude fiber 3.2%, crude ash 12.0%, ash insoluble in HCl 10.0%, calcium 0.65%, phosphor 0.27%, sodium 0.05%

Feeding recommendation: Add daily 5-10 g/100 kg body weight to the feed. As required, the feeding amount can be increased. 1 tbsp. corresponds to ca. 10 g. Maximum amount of **EquiGreen Prebiotic**: 200 g/kg of complete feedingstuff.

The simultaneous oral use with macrolides shall be avoided.
