Height	116mm

Product description

Complementary feed (liquid) for pigeons

Drinking water supplement to support feed intake in the case of nutrition-related upper respiratory tract problems

The condition of the respiratory tract is of crucial importance in the sport of carrier pigeons. Only healthy pigeons with clean breath slits and white noses bring top performances.

COLUMBAVet TurboBronchial Drinking Water consists of highly concentrated essential herbal oils of purely natural origin. The active substances, contained in the essential oils, nutrition-related support the condition of the respiratory tract. Through an optimal respiratory condition and thus improved breathing, the feed conversion and intake is also positively influenced.

Expert Tip: COLUMBAVet TurboBronchial Drinking Water can also improve the pigeon loft climate: Add 30 ml to a litre of water and spray in the pigeon loft.

- Ensures healthy air
- Reduces respiratory irritation by dust particles
- Repels flies and other annoying flying insects
