Fit-BARF Eggshell Powder 1 kg | 1 kg

Manufacturer	Fit-BARF
Product number	228
Weight	1kg
Length	98mm
Width	98mm
Height	158mm

Product description

Calcium intake, in particular, plays a major role in the feeding of raw meat. This can only be achieved by feeding sufficient bone. Not every dog can or wants to eat bones, and in the case of cats, feeding whole prey (mice or chicks) is not always problem-free either.

Fit-BARF Eggshell Powder is a readily utilizable animal source of calcium for daily feeding. It provides balance when feeding raw meat by balancing the high phosphorus content of the meat with its natural calcium content. Due to the fine degree of grinding, the product has a high bioavailability.

neutralization of phosphorus excess with predominant meat feeding
for bone-free feeding
as an extra source of calcium in times of increased demand (growth, gestation, lactation)
