**Manufacturer** 

**Product number** 4214  
**Length** 110mm  
**Width** 70mm  
**Height** 70mm

## Product description

The dogs' natural chewing need is equally distributed across all breeds and all sizes, regardless of their age. Young dogs have an above-average chewing desire during tooth change. The Fit-Hap chewing root satisfies this desire in a completely natural way.

Chewing roots are:

- greaseless
- hypoallergenic
- employment
- dental care
- durable and without sharp edges

Occurrence and nature of the chewing roots:

The Fit-Hap Chewing Roots are made from Mediterranean hardwood of very high quality. The special heather from which our roots come from grows a maximum of 30 km from the sea. To be found in countries like Portugal, southern Spain or Greece and also on the hard floors of La Gomera or Madeira. The nature of the root makes it ideal as a chew toy for dogs. The structure is hard and extremely robust. The root also has no sharp edges.

While the wolf can chew on the bones of its prey in the wilderness, the family dog ??searches in vain for anything comparable in its bowl. Give your dog natural dental care with the Fit-Hap chewing root. Chewing roots are well accepted by dogs who generally like to chew. Because the chewing root is a natural product, the shape of the chewing root can vary.

Shared responsibility: Like all chewing toys, the Fit-Hap Chewing Root should be given under supervision. If the chewing root has become too small, please remove it. Otherwise it could be swallowed like any toy that is too small.
